

NOTICE OF INDEPENDENT REVIEW DECISION

January 28, 2003

RE: MDR Tracking #: M2-02-1100-01
IRO Certificate #: IRO 4326

The ____ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The Texas Workers' Compensation Commission (TWCC) has assigned the above referenced case to ____ for independent review in accordance with TWCC Rule §133.308 which allows for medical dispute resolution by an IRO.

____ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. In performing this review, relevant medical records, any documents utilized by the parties referenced above in making the adverse determination, and any documentation and written information submitted in support of the appeal was reviewed.

The independent review was performed by a ____ physician reviewer who is board certified in physican medicine and rehabilitation which is the same specialty as the treating physician. The ____ physician reviewer has signed a certification statement stating that no known conflicts of interest exist between him or her and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for a determination prior to the referral to ____ for independent review. In addition, the reviewer has certified that the review was performed without bias for or against any party to this case.

Clinical History

This 52 year old female sustained a work-related injury on ____ when she fell while trying to open a box and injured her right knee. An MRI performed on 08/07/00 revealed a medial meniscus injury (tear) that was repaired arthroscopically on 09/14/00. In January of 2002 a chronic pain management program was recommended. The treating physician has recommended that the patient undergo the chronic pain management for an additional 15 sessions.

Requested Service(s)

An additional 15 sessions of a chronic pain management program.

Decision

It is determined that the additional 15 sessions of a chronic pain management program is not medically necessary to treat this patient's condition.

Rationale/Basis for Decision

This patient has been diagnosed with post-traumatic arthritis and popliteal cyst of the right knee. Further diagnostic workup in the form of an MRI and weight bearing x-rays of the right knee would need to be completed prior to participating in additional sessions of a chronic pain management program. Therefore, it is determined that the additional 15 sessions of a chronic pain management program is not medically necessary.

This decision by the IRO is deemed to be a TWCC decision and order.
